Cloud Deployment Options

Considering Cloud?
Manhattan Associates has the Solution

A hallmark of the modern enterprise is adaptability. Manhattan Associates' Cloud, Managed Services and on-premise solutions help you meet business objectives. Equally important, having a range of options allows the enterprise to bring an array of strategic initiatives from across the organization, such as omni-channel retail order management, transportation management, inventory optimization and more, to life.

Solutions that Fit

Customer expectations are increasing at an accelerated pace. It doesn't matter if you're a retailer, wholesaler or other member of the commerce ecosystem. While it's an exciting time, it's also one where resources – people and technology – are getting squeezed to do more with less, prompting questions like:

• Is cloud right for my business?
• Do I have enough IT support in-house or is a managed service a better way to go?
• How can I meet my corporate and IT goals and objectives?

No matter what the answer, Manhattan Associates delivers a full spectrum of Cloud Services that range from Software-as-a-Service (SaaS) to Single Tenant Hosting to Application Managed Services.

Manhattan Associates®

Your Business. Your Choice.

Manhattan's solutions and services give you the nimbleness to innovate with speed and at scale while aligning technology with business needs.

- Leverage a range of SaaS, co-managed and fully managed solutions
- Coordinate your IT environment with Manhattan's cloud-based solutions

- Reduce the need to purchase hardware and third party software
- Keep IT staff focused on strategic initiatives by relieving them of the burden of day-to-day maintenance

Navigate a Changing Marketplace

A new competitor may pop up tomorrow. Investors want to see increased inventory turns. Consumers demand convenience and selection. With Manhattan, you get access to what you need to respond and get ahead.

- Accelerate your business transformation with security, visibility and reliability
- Bend and flex with the market

- Increase stakeholder and customer satisfaction
- Reduce capital expenditures with pay-as-you-go SaaS solutions and hosted services

Gain Flexibility and Control

A diverse enterprise architecture requires a partner with the experience and the capabilities to support a variety of deployment options. That's why our cloud solutions are built with flexibility in mind, while still providing the control you need to ensure consistent policies and procedures.

- Ability to implement hybrid cloud/on-premise models across systems and environments
- Support for multiple industry-standard infrastructure technologies such as operating systems, enterprise application integration (EAI) middleware and database management systems (DBMS)

- Teams of highly-experienced industry experts and thought leaders available to help you formulate your deployment strategy
