

MANHATTAN ACTIVE[®] TRANSPORTATION MANAGEMENT

Intelligently optimize every shipment in real time across all transportation options

Manhattan Active Transportation Management is cloud-native and built entirely from microservices, delivering unprecedented speed and intelligence in planning optimization. It offers simple and complete extensibility to add new features and network partners. Users orchestrate global delivery like never before through a single, easy-to-use, intuitive user interface.

INNOVATION AND EXTENSIBILITY

- › The most adaptable, configurable and scalable TMS ever
- › Planning & execution, appointment scheduling and freight audit & claims in a single app
- › New innovations and features added every quarter
- › Extensible at every level: data, UI, services, network
- › Seamless integration of new network partners
- › Interactive digital freight marketplace connectivity

**Focus resources on
operations, not technology**

INTELLIGENCE AND OPTIMIZATION

- › Industry's fastest, multi-modal planning optimization core
- › Adaptive routing that utilizes dynamic data and actionable insights
- › Simultaneous consideration of all options of fleets, carriers and routing
- › Offers the most network visibility ever
- › Manage by exception instead of touching every load

**More speed, more
intelligence, lower costs**

EXPERIENCE AND INSIGHTS

- › Real-time unification of insights across distribution and transportation networks
- › A single, modern interface across carrier portal and mobile app
- › Immediate access to market rates and capacity
- › In-app messaging for better communication and collaboration
- › New configuration wizards for faster time to value

**Access to capacity, faster
onboarding, improved
experiences**
